

Shade Shifter - Buy Later

Items intentionally deferred until the bench, fit or safety gates have passed. Items: 6.

Actual product photo	Purchase	Exact part and source	Qty.	Required specification	Do not buy
	BUY LATER About \$150 each	Protected 200 mAh LiPo samples Open product/photo source	3	3.7 V, around 25 Å— 9 Å— 4 mm, protection PCB, traceable model and confirmed connector polarity.	Do not buy an unprotected pouch cell or assume red/black wire polarity without measuring.
	BUY LATER \$900—\$2,500 total	Low-current LiPo charger Open product/photo source	3	Single-cell charger configured for 50—100 mA; protection and power-path/load-sharing preferred.	Do not connect a default 1 A TP4056 board to a 200 mAh cell.
	BUY LATER About US\$50; currently enquire	2.1-inch flexible six-color EPD Open product/photo source	1—2	E-Paper Innovation flexible color model: 46.08 Å— 28.03 mm active area, six colors, 30 mm bend radius.	Do not order without its compatible evaluation board and waveform/controller support; do not cut it.
	BUY LATER \$1,500—\$15,000 by stage	3D-printed frame set Open product/photo source	1 set first	One front and two temples from project CAD; PLA fit-check first, PA12 functional print only after fit approval.	Do not order a large batch or prescription-ready frame from unvalidated preview STL geometry.
	BUY LATER \$1,000—\$4,000	Adhesive and protective-laminate samples Open product/photo source	Small samples	3M 467MP/468MP-type transfer tape, clear PET overlay and supplier-approved display adhesive.	Do not use cyanoacrylate on display film or unknown adhesive against skin.
	BUY LATER Do not order before engineering quote	Custom E Ink Prism 3 module Open product/photo source	Quote only	Custom segmented eyeglass geometry, six colors, driver/waveforms and bend confirmation supplied by E Ink.	Do not purchase architectural Prism sheets, a large Venus board, or loose “E-Ink liquid” for the wearable.
